

The TS-32 is too large to fit inside the case of the 3200A unless you remove the internal speaker and install the TS-32 in the open area provided for the speaker. If you do not want to use an external speaker, then our model TS-32HB will fit to the front of the main board behind the lithium battery.

SPECIAL NOTICE

WHEN MOUNTING THE TS-32 WITH A 90 DEGREE ANGLE BRACKET AGAINST THE PCB, BE SURE TO USE THE TWO FIBER SPACERS PROVIDED BETWEEN ANGLE BRACKET AND PCB. IF THIS IS NOT DONE, THE BRACKET WILL SHORT OUT FOILS ON THE PCB
